

# Analyzing Risk of Gentrification in Boston

By Ben Gaudiosi, Ray Katz, and Ned Gleesin

## Introduction

In urban areas, gentrification is one of the most significant problem affecting low income communities. New buildings are put up, rent increases, and all of a sudden, the residents can no longer afford to live in the place they once called home. Our project analyzes the risk of this phenomenon in many of Boston's neighborhoods by investigating various demographic, income, public transit, and housing statistics.

## Datasets

- 2010 U.S. Census
- 2015 American Community Survey
- City of Boston Data Portal
- MBTA Routes and Stops

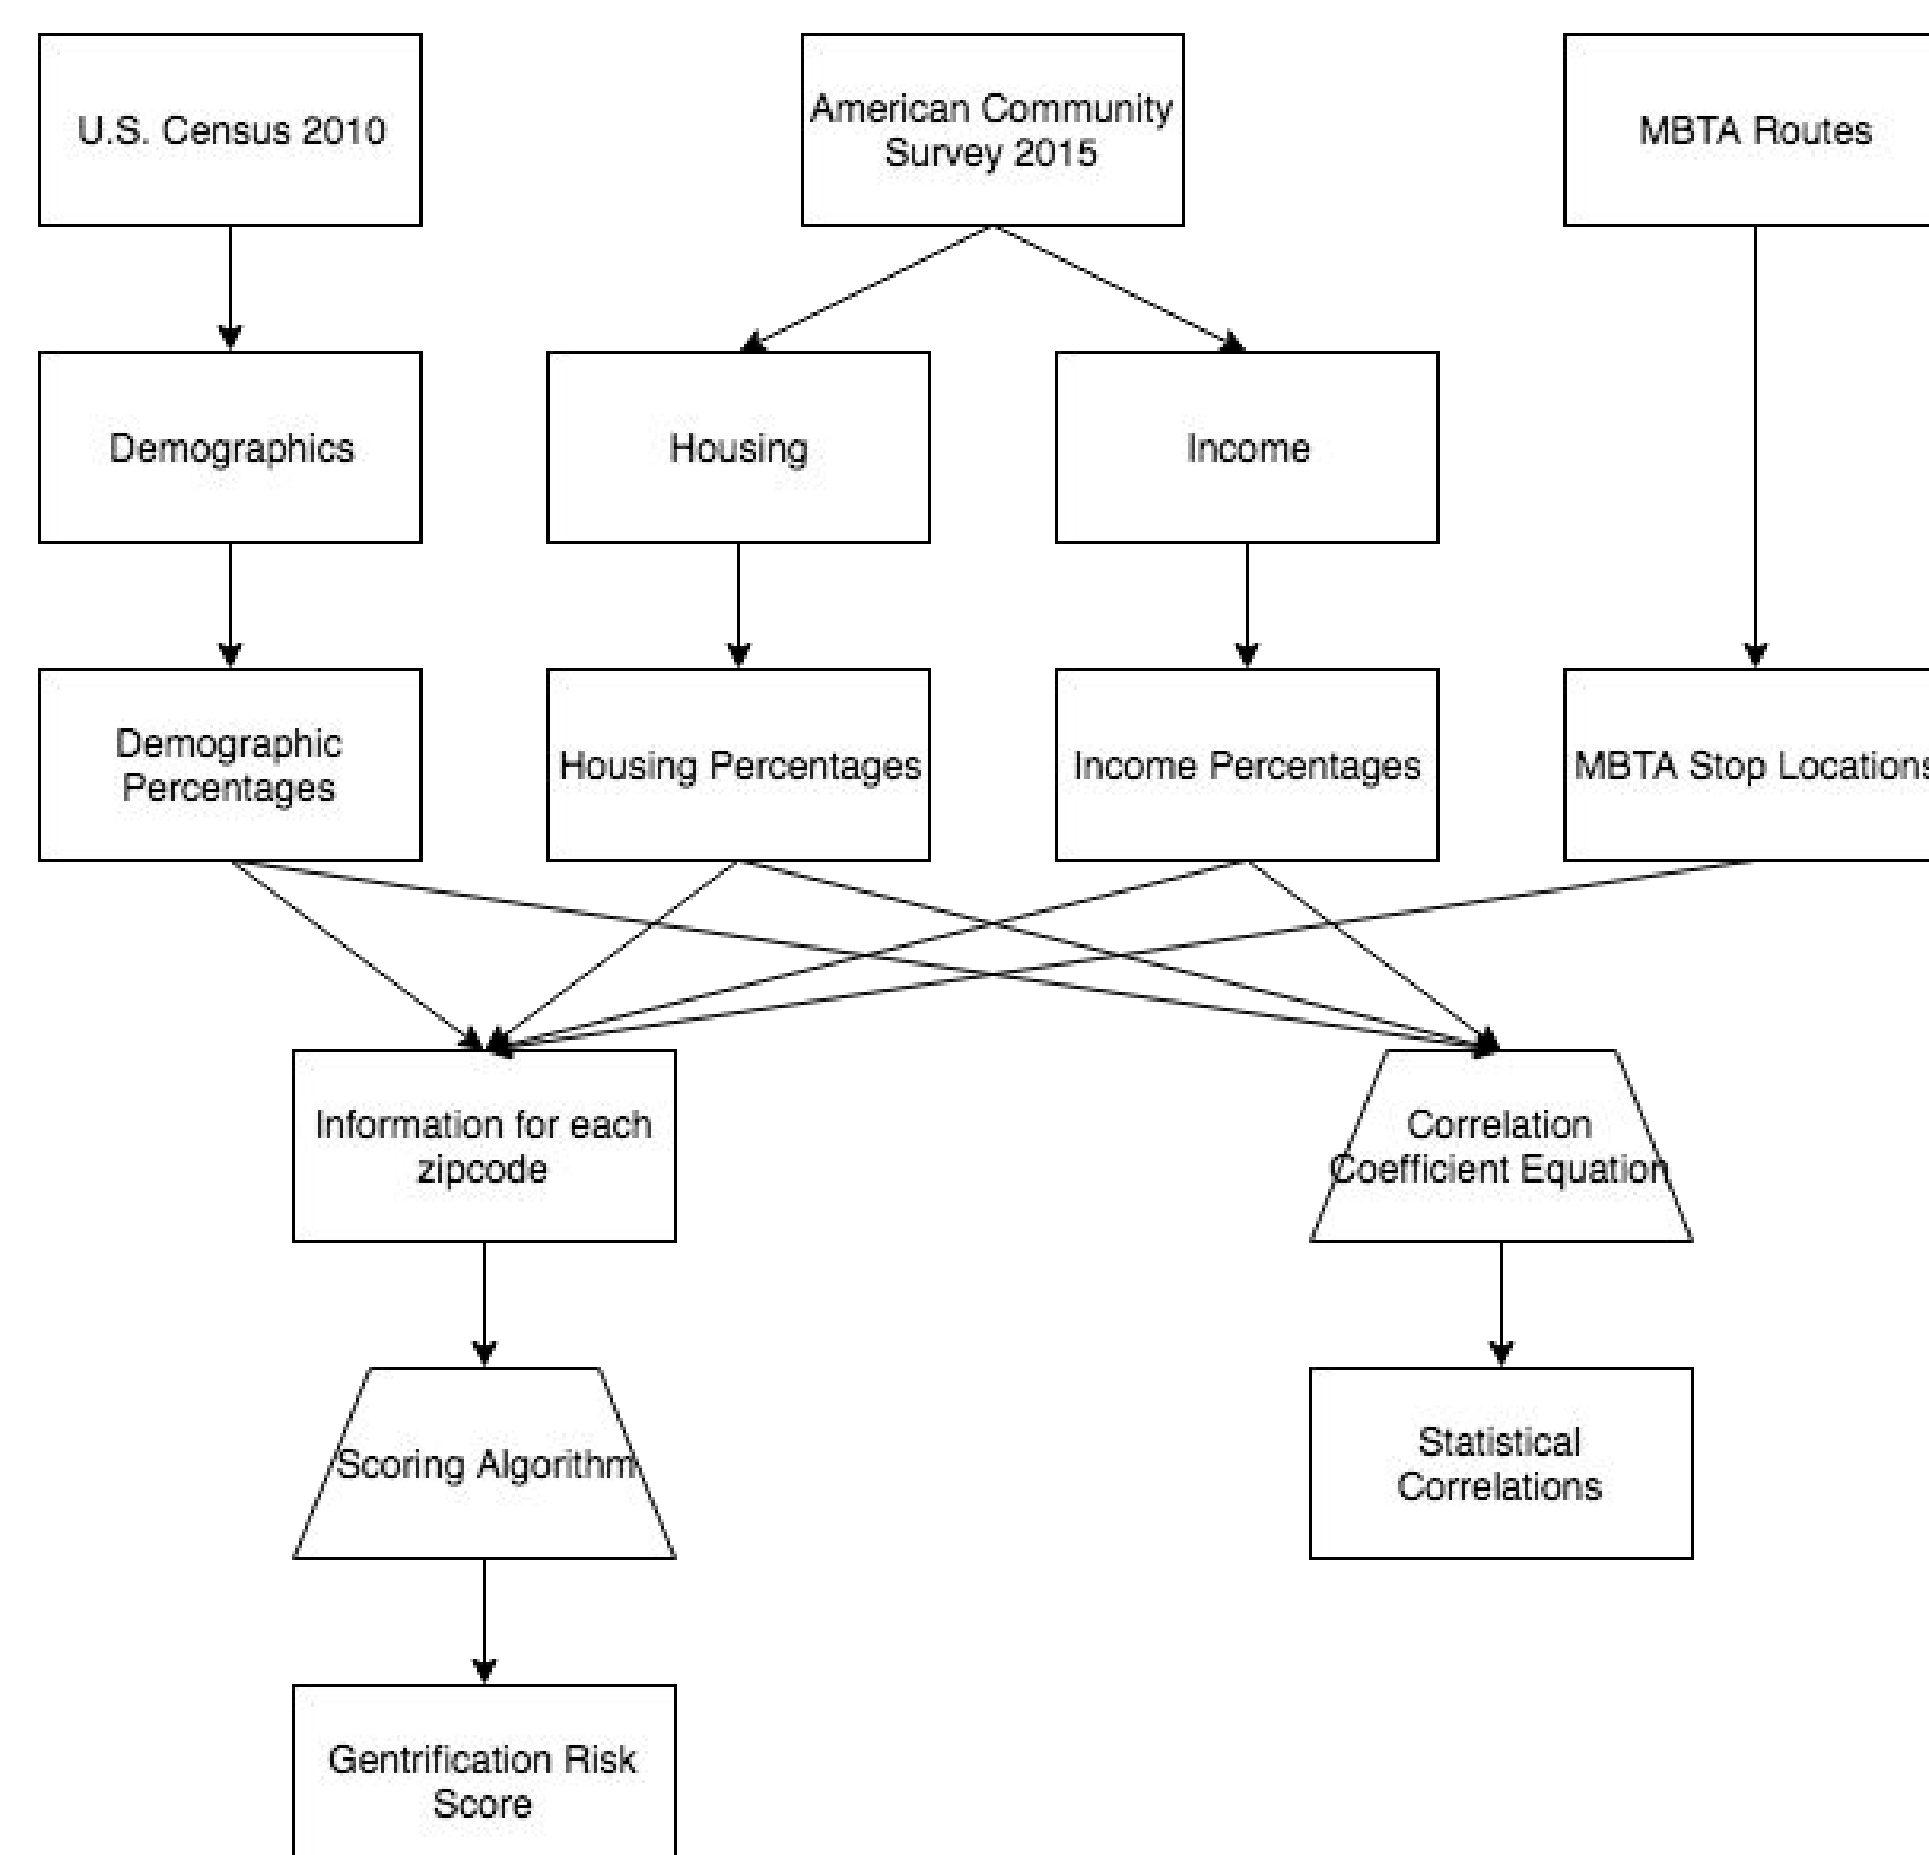

Figure 1: Map of Boston showing which neighborhoods are most susceptible to gentrification. Red means that a neighborhood has a higher chance.

Median Income	Median Rent	0.47
Median Income	Public Transit %	-0.65
Median Income	Old Homes %	-0.14
Median Income	Unemployment	-0.70
Median Rent	Married %	0.01
Median Rent	Poverty Rate	-0.63
Median Rent	Unemployment	0.42

## Analysis

Many studies have examined the indicators of gentrification. However, after exhaustive research we came up with a scoring method for analyzing the likelihood an area is undergoing the process of gentrification. We first normalized all of our variables. Then, for each neighborhood, we summed the distances from the means for each variables and gave the anti-indicators a negative weight. This method is obviously not perfect, as some variables likely have more influence than others, but we believe this provides at least some insight into a very complex issue.

## Conclusion

Our analysis shows that parts south Boston appear to be greatest risk of undergoing the process of gentrification.. Community leaders should look to mediate so that residents of these neighborhoods aren't displaced by rising rents. Looking ahead, it's clear that more research needs to be done on how significantly each of the factors we used affects a neighborhoods gentrification risk. More research needs to be done in order to redner an accurate scale.
